HARMFUL INFORMATION & NARRATIVE RISK

Analysis, Measurement & AI Tooling

FR / U.S. dual citizen · works in FR & EN

01 – SUMMARY

Analyst working at the intersection of narrative risk and communications measurement, with **8+ years across international organizations**. At the International Federation of Red Cross and Red Crescent Societies (IFRC) I lead narrative and audience analysis for a 191-member network — real-time social analysis in 30+ languages, tracking how harmful narratives emerge, spread, and cause real-world harm — and deliver the **Monthly Pulse**, the executive insights program presented at Under-Secretary-General level. I build the AI tooling behind the work: three automated monitoring pipelines on the Claude API, running daily through a live public-health emergency. Co-penholder on the Red Cross Red Crescent Movement's 2026 resolution on harmful information. Portfolio: luciletranchant.com

02 – SKILLS & TOOLS

NARRATIVE & RISK ANALYSIS	Narrative tracking & analysis, harm-taxonomy design, source-risk tiering, sentiment & audience analysis, social listening & media monitoring (30+ languages), benchmarking & KPI framework design, campaign & launch impact measurement
DATA & AI TOOLING	Python (pandas, API automation), Claude API & prompt engineering, automated analysis pipelines (GitHub Actions), JSON schema design, Model Context Protocol (MCP), SQL (working knowledge)
PLATFORMS	Sprinklr / TalkWalker, Google Analytics 4 (GA4), Looker Studio, Google Search Console, MuckRack, Meta Business Suite, Salesforce, Power BI
STAKEHOLDERS & STORYTELLING	Executive presentations at Under-Secretary-General level, cross-functional project leadership, data storytelling & insight narratives, vendor & platform management
LANGUAGES	French (native), English (full professional proficiency)

03 – EXPERIENCE

Senior Officer, Communications Monitoring & Analysis

Sep 2025 – Present

International Federation of Red Cross and Red Crescent Societies (IFRC) · Geneva, Switzerland

- Create and deliver the Monthly Pulse, the IFRC's executive insights program: synthesizing social listening (Sprinklr), web analytics (GA4), media monitoring (MuckRack), and podcast data into narrative-driven briefings with actionable recommendations, presented monthly at Under-Secretary-General level
- Lead narrative and audience analysis for a 191-member network — real-time social analysis across 30+ languages tracking how narratives emerge, spread, and solidify, identifying the audiences shaping them, and translating findings into tactical response recommendations during live emergencies
- Scope and deliver custom research end to end — brief, methodology, execution, and insight narrative — most recently a full-year executive social-media presence study with peer benchmarking, translating leadership questions into research design and findings into channel recommendations
- Co-developed the measurement framework for the IFRC Global Communications Strategy 2026–2030, defining four network-wide performance indicators adopted for the 2027–2028 Plan and Budget; manage the measurement platform stack behind it (Sprinklr, MuckRack, GA4, Looker Studio)
- Built AI research tooling as a personal initiative: three automated monitoring pipelines (Python, Claude API, GitHub Actions) running daily narrative and risk analysis during live emergencies, including the 2026 Ebola public health emergency — 50+ editions shipped
- Identified ~47K bot-pattern accounts inflating web analytics and ~100x vendor reach inflation; rebuilt executive reporting on verified native metrics to protect decision quality at leadership level
- Lead launch and campaign impact measurement, including the World Disasters Report 2026: post-launch analysis of external reactions and sentiment, benchmarked against previous launches
- Co-draft the Movement's 2026 Council of Delegates resolution on harmful information as co-penholder with ICRC and the Swiss Red Cross — multilateral consultations across 191 National Societies — and supported the launch of the Movement Hub on Harmful Information

Digital Fundraising Integration & Analytics Officer

Nov 2023 – Sep 2025

UNICEF · New York, United States

- Monitored media and social conversations to inform rapid-response strategy and delivered post-campaign impact reports during high-profile emergency campaigns
- Built and maintained real-time analytics dashboards and automated reporting systems guiding communications and fundraising strategy across HQ, 33 National Committees, and country offices
- Analysed website user behaviour and donor journeys across 4 digital platforms, designing cross-domain tracking architecture to identify trends, pain points, and improve end-to-end conversion
- Produced monthly and annual performance reports with clearly defined KPIs and channel benchmarks, driving data-driven decision-making across senior leadership
- Piloted Salesforce CRM integration, translating complex requirements into technical specifications for vendor implementation

Digital Analytics & Fundraising Integration Consultant

Oct 2021 – Oct 2023

UNICEF · New York, United States

- Developed and optimized high-stakes emergency response campaign workflows on unicef.org, integrating fundraising mechanisms with global communications platforms serving millions of monthly visitors
- Designed analytics systems tracking end-to-end user journeys, running A/B experiments and user testing that improved donation conversion rates
- Delivered post-launch reports analysing campaign performance, external reactions, and competitor moments to guide future communications strategy

Co-Founder & Digital Marketing Strategist

Nov 2019 – Nov 2021

Tu y Yo (Digital Marketing Consultancy) · New York, United States

- Co-founded a consultancy delivering end-to-end digital strategy for clients including UNICEF and Janus Henderson; synthesized multi-source data into client performance reports with actionable recommendations

Marketing Communications Project Manager

May 2018 – Jul 2019

LGO Group (FinTech Startup) · New York, United States

- Developed content strategies translating complex digital asset concepts for non-technical audiences, growing communities of 10,000+ Twitter followers and 7,000+ Discord members; tracked performance metrics to optimize targeting, increasing web traffic 3x

Demand Generation Manager

Apr 2017 – Apr 2018

EachScape · New York, United States

- Led demand generation and performance tracking for the retail vertical, analysing multi-channel campaign metrics to improve lead-to-close conversion rates

04 – EARLIER EXPERIENCE

Public Relations Assistant — Hermès, New York

Feb – Jul 2016

International Digital Project Manager Assistant — MAKE UP FOR EVER (LVMH), Paris

Jul – Dec 2015
